Jail Cells and Cages

Are made any size required, of Plate Iron and Lattice Work and of combination Iron and Steel, case hardened or Chrome Steel, hardened; or the Plate Iron Cells and Cages can be lathed with Steel, making the work proof against drilling or cutting with any tool.

The different plans and designs in this Catalogue show the manner of construction, and locking arrangements. The Levers of all Lock Bars are enclosed and protected in a separate iron box, outside of Corridor Guard.

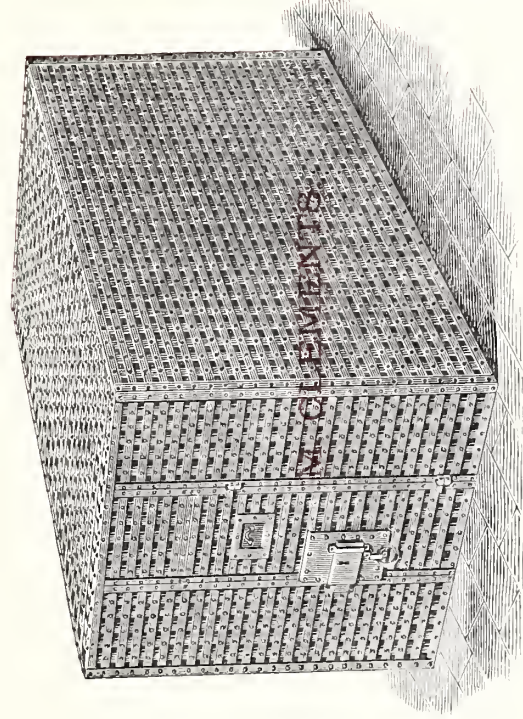

The Cells have boxes with Ventilating Flues for Night Buckets, if required.

ESTIMATES, PLANS and SPECIFICATIONS  
furnished for all kinds of Jail Work, put up in any part of the country; and also for Iron Store Fronts, Columns and Girders, Iron Railing of various designs, Bank Vaults, Fire-Proof Doors, etc., etc, Balconies and Verandas, Railing for Cemetery Lots, etc.

**JAIL CAGES—made any Required Size.**

Single Cages are made any size required. The Floor and Top are usually made of Plate Iron, and the Front, Sides and Back of Cage are made of lattice work. The cost of cages will be according to size required and the size of bars and meshes. The cages are finished and fitted together in sections, with door and five tumbler

Jail Lock, with duplicate keys, all complete.

Any ordinary mechanic at the place can finish and put the

Cage up in place.

PLAN No. 1.

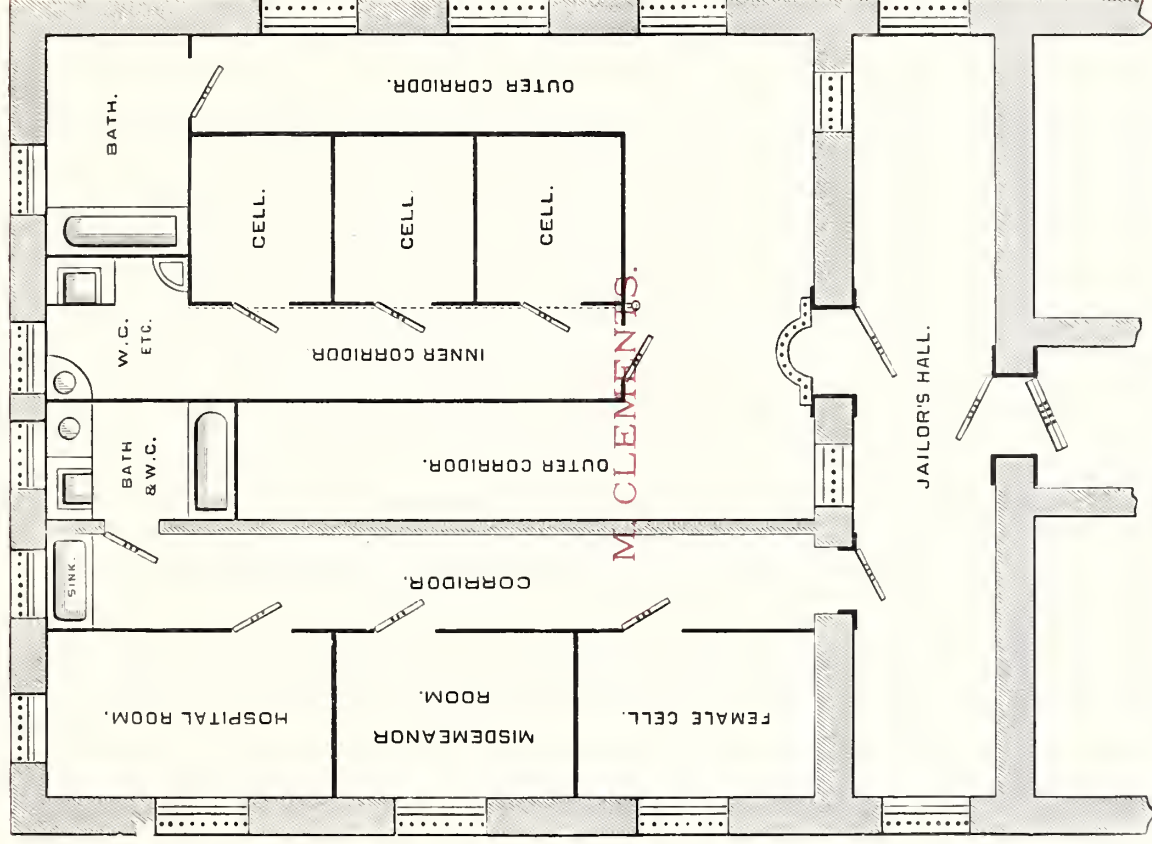

This plan shows the location of any number of Cells placed back to back, with a Corridor all around the Cells. Water Closet and Sink in back Corridor adjoining the Ventilating Flue. Iron

Bedsteads are placed in Cells when required.

# M. CLEMENTS, Architectural Iron & Jail Works,

CINCINNATI, O.

PLAN No. 2.

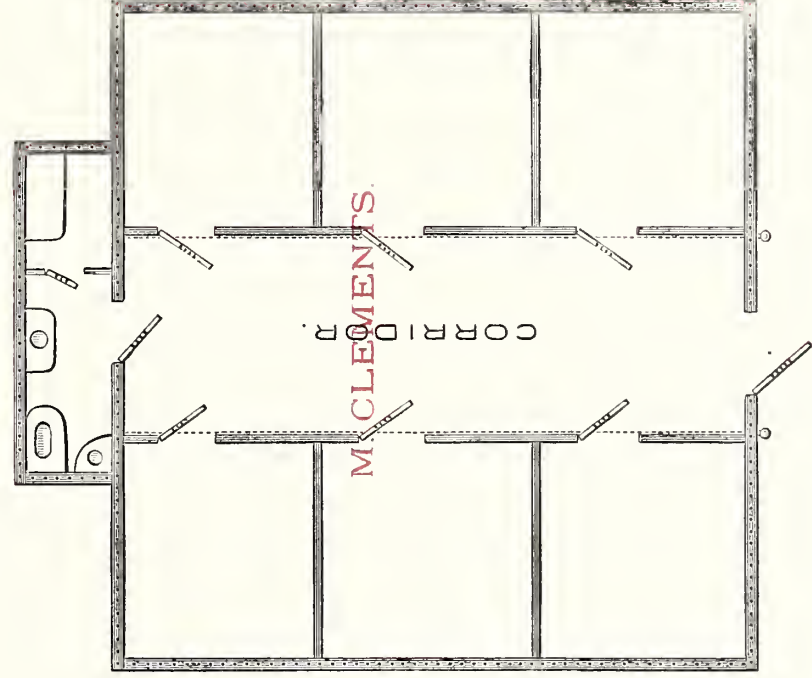

This plan shows the location of any number of Cells for one or more stories in height. The rooms for female prisoners, the misdemeanor room, and hospital room, can be located as shown, or in any other part of the building. The partition dividing the male and female prison can be of brick or plate iron, or wood lined with iron. All the Sanitary arrangements, as shown on this plan, are complete, and the Light and Ventilation are all that could be desired; the Water Tank can be placed on top of Cells or on any of the upper floors where convenient. Where prisoners are allowed the use of Outer Corridor in daytime, the walls should be lined with Plate Iron.
